Equaleasy - Buoyancy and equalisation

1.

During the dive I feel discomfort in my ears. I am probably unwillingly descending. What should I do?

 \bigcirc A. Ascend to a comfort depth and try to equalise again.

○ B. Stop, equalise, and continue diving at the same depth.

None \odot

2.

In order to control the buoyancy, I should rely more often on:

 $\odot\,$ A. The BCD, which is more reliable, has been developed for this purpose.

 \bigcirc B. My lungs and respiration.

None \odot

3.

The most frequent accident related to a poor buoyancy control is:

A. Barotrauma.B. DCS.

None 💿

4.

When I stop finning, I always sink a bit:

○ A. It is absolutely normal.

 $\odot~$ B. It is the sign I am negatively buoyant.

None \odot
