

Equaleasy - Buoyancy and equalisation

1.
During the dive I feel discomfort in my ears. I am probably unwillingly descending. What should I do?

- A. Ascend to a comfort depth and try to equalise again.
- B. Stop, equalise, and continue diving at the same depth.

2.
In order to control the buoyancy, I should rely more often on:

- A. The BCD, which is more reliable, has been developed for this purpose.
- B. My lungs and respiration.

Ninguna ☉

3.
The most frequent accident related to a poor buoyancy control is:

- A. Barotrauma.
- B. DCS.
